Programme Description group Budapest XV. kerület Dózsa György Gimnázium és Táncművészeti Szakgimnázium

03 April – 10 April

Package includes :

Accommodation: Host Family – Sharing rooms on Full board with packed lunch.

Airport Transfers - Meet & greet at airport on arrival

15 Hours/ week of Developmental programme

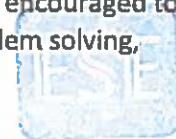

Environment and Sustainability

- Understand and apply the principles of sustainable development – what is sustainable development? What are the three pillars of sustainable development? How does sustainability effect the economy? What is circular economy?
- Carry out justification exercises and feasibility studies leading to the efficient and effective utilisation of resources – using critical thinking and problem solving skills to define efficient and effective use of resources
- Understand best practice relevant to waste, pollution and efficiency in resources utilisation – what is currently being done versus what is still needed to do and how to implement this
- Environmental sustainability project – students will be asked to give a presentation on concrete changes to implement at home/school/sports centre/shopping centre etc in order to become more sustainable. Their project must work around the SMART model

The sessions will be in the form of lectures given by professionals in the field, visits to companies/institutions and in class activities coordinated by ESE teachers.

The language of communication will be English giving the students the opportunity to practice and improve their language skills through listening, reading, speaking, collaborative tasks, research and presentations.

Through this programme and the various activities organised, the students will be encouraged to develop their 21st Century Skills for learning and innovation, critical thinking, problem solving, developing creativity and innovation.
